

# Write up for Fib Seq

Robert Ebanks

February 14, 2019

(1) Made a for loop that printed true if the left and right side of the identity were equal. Then I simply moved the starting numbers up and down the fib seq.

(2) It holds for every other pair on the sequence.

(3) I was unable to find a new identity, as the "simple" task of plugging in Cassini's identity proved much for me because of a multitude of syntax, and mathematical errors.
